LOST STREAM MAP

The STREAM & LAKE MAP OF OREGON resembles another map-- known to Pennsylvania anglers as the "Lost Stream Map."

The "Stream Map of Pennsylvania" was completed in 1965 after a 30 year effort by Howard Higbee, a former Penn State Professor.

Professor Higbee succeeded in creating a map of the highest detail possible...a map that shows every stream and lake. He painstakingly plotted by hand, the location of 45,000 miles of streams onto a 3 by 5 foot map.

The map sold extremely well - until it was lost several years later. Incredibly, the printer entrusted with the original drawing and printing plates declared bankruptcy, then carelessly hauled Higbee's 30 years of work to the landfill.

The few remaining dog-eared copies became a prized fisherman's possession. Professor Higbee was offered \$400 for one of his last maps. And state agencies were forced to keep their copies under lock and key.

The experts had always told Professor Higbee that reprints were impossible, because the maps were printed in non-photographic blue.

Then, in 1991, at the age of 91, Howard Higbee's dream came true. Computers made it possible to reprint the map. Holding an updated map, Howard said, "I never thought I'd live to see this day."

Then, by combining Professor Higbee's knowledge with computer technology -- the STREAM & LAKE MAP OF OREGON was created.

Why every angler and boater needs this map

Professor Higbee's® Stream & Lake Map of Oregon is the first and only highly detailed map of its kind. The 3.5-foot-by-4.5-foot Oregon map shows 114,823 miles of streams plus lakes.
